

<p>Ultimate Fanlite</p>		<p>The Fanlite is a spectacular resource that encourages vocalisation, communication and helps develop fundamental cause and effect skills. An individual can whistle, shout, sing into the microphone, clap their hands, or stamp their feet – any noise will bring the Fanlite to life. The Fanlite can be adjusted to show different light displays and has a range of interactive settings.</p>	<p>Fixed - Sensory Room</p>
<p>Tactile Panel</p>		<p>The wooden board is designed to maximise visual and tactile stimulation for people of all ages. The air balls, coloured wooden balls and ball tube are ideal for motion and colour work. While the spirals, clatter balls and chains provide auditory and visual stimulation. Hard and soft textured panels and spiked balls provide enjoyable tactile sensations to explore. The shaped mirrors are designed to aid communication awareness. The balls are collected from the collection tray below the panel and can be placed in the tunnels.</p>	<p>Fixed - Sensory Room</p>
<p>Ball Pit</p>		<p>This is no ordinary ball pit! The LED lights illuminate the clear balls to create a stunning visual effect. We encourage individuals to lay down in the ball pit, relax and look up to see a reflective mirror and beautiful arrays of light.</p>	<p>Fixed - Sensory Room</p>
<p>Reflective Mirror and lighting Panel</p>		<p>The Reflective Mirror and Lighting Panel can be experienced from the ball pit. The colourful array of lights and reflections create a calming and relaxing environment.</p>	<p>Fixed – Sensory Room</p>

Sensory Den		<p>The Den is a small soft play den lined with colourful fibre optic carpet. It provides a darkened, quiet, sensory space where individuals can crawl into and relax while discovering a world of twinkling LED lights. The back mirror enhances the experience for the individual.</p>	Fixed - Sensory Room
LED Magnetic Wall		<p>The Magnetic Wall encourages individuals to use their imagination by increasing creativity, promoting problem-solving skills, colour recognition and visual-spatial reasoning. The LEDs allow for different combinations of light for fun and education, while the magnetic Connetix tiles can assist with developing motor skills, creativity, and shape recognition.</p>	Fixed - Sensory Room
Lycra Swing		<p>The multi-functional swing provides sensory support individuals need to calm and regulate their bodies. An individual can climb into the swing, stretch out and move around. The swing encourages body awareness, balance, motor planning and spatial skills. The stretched, heavy-duty fabric provides sensory pressure all over and creates a fun, private space to bounce, swing, spin or lie still while enjoying the movement.</p> <p>As the weight limit for the swing is 55kg, unfortunately, this is only available for children.</p>	Fixed - Sensory Room
LED Magnetic Wall		<p>The LED wall allows different combinations of light colours and themes.</p> <p>The magnetic wall allows individuals to use magnets to increase creativity, problem solving skills, colour recognition and visual spatial reasoning.</p>	Fixed – Sensory Room

Ceiling Hoist System		<p>The Ceiling Hoist System allows anyone who requires mobility assistance to access the sensory room and enjoy all the equipment.</p> <p>Hoist users must provide their own sling and have a competent, fully trained person with them to use the hoist.</p>	Fixed – Sensory Room Swing not provided
Ultra Violet Bar		<p>The directional light from the Ultra Violet Bar produces a stunning, vibrant effect, bringing relaxation and stimulation to individuals.</p>	Fixed - Sensory Room
Mirror Ball		<p>The Mirror Ball creates multiple shafts of light that dance around the room when a pinspot is shone into the ball. Ideal for promoting tracking skills in any darkened environment while creating a captivating visual effect.</p>	Fixed - Sensory Room
Water Effects		<p>The Water Wave Light Effect is a vivid, LED lighting system that projects a realistic water effect onto any surface, perfect for creating an ambient atmosphere.</p>	Fixed - Sensory Room
Solar LED Projection		<p>The Projector can help create different visual stimulations, images, mood, themes and colours throughout the Sensory Room.</p>	Fixed – Sensory Room
Solar LED Projection		<p>The slowly rotating projector images create a blanket of colour and movement. The themes available are Plants, Woodland, Space, Coral Reef and Africa.</p>	Fixed - Sensory Room

<p>Acrylic Mirror</p>		<p>The Acrylic Mirror draws individuals in for observation of themselves and objects. The convex mirror dome provides a distorted and fun view.</p>	<p>Fixed - Sensory Room</p>
<p>Mood Lights ( Triangle, Square, Prism)</p>		<p>These lights can help create a sensory calming experience while stimulating creativity, capturing imagination and colour recognition. The lights can flash, strobe and change colour. The shapes are portable and durable.</p>	<p>Floating – Sensory Room</p>
<p>Bolster and Barrel Set</p>		<p>The Soft Play Bolster and Barrel Set provides various types of sensory input, including tactile, visual, proprioceptive and vestibular. Soft play equipment can help develop gross motor skills, hand-eye coordination, and balance skills through play. Rolling over the plug and crawling through the tunnel increases balance and coordination. These pieces can be used together for educational purposes or separately to create an obstacle course.</p>	<p>Floating - Sensory Room</p>
<p>Rainbow Bridge</p>		<p>The Rainbow Bridge can help develop gross motor skills, hand-eye coordination, and balance skills through play.</p>	<p>Floating - Sensory Room</p>
<p>Cross the River Set</p>		<p>The HART Cross the River Set combines multiple elements to create an entertaining obstacle which teaches balance, coordination and spatial awareness. The pieces can be held together as a solid structure or used separately to create various configurations.</p>	<p>Floating - Sensory Room</p>

<p>Foam Stepping Stones Set</p>		<p>The HART Foam Stepping Stones are great for developing gross motor skills such as balance and coordination. They come in various sizes and colours and can be used for sitting, climbing or as part of an obstacle course.</p>	<p>Floating - Sensory Room</p>
<p>Landing Mats</p>		<p>The Landing Mat allows a soft and supportive surface for individuals to work and play.</p>	<p>Floating - Sensory Room</p>
<p>Crash Mat</p>		<p>The Crash Mats provide much needed heavy support work and deep pressure input.</p>	<p>Floating - Sensory Room</p>
<p>KloudSac</p>		<p>The therapeutic dream-foam filling of the KloudSac provides proprioceptive (deep pressure) sensory input to calm the nervous system, help self-regulate emotions and curb challenging behaviours while having an organising effect for many individuals. The foam-filled therapy stimulates deep touch pressure on the body's joints and muscles, providing sensory input to calm individuals who experience stress and anxiety.</p>	<p>Floating - Sensory Room</p>
<p>Peanut Ball</p>		<p>The Peanut Balls are great for individuals who struggle with balance (vestibular input), developmental delays, gross motor skills, low muscle tone, coordination, sensory seeking behaviours and attention challenges.</p>	<p>Floating - Sensory Room</p>

<p>Curved Balance Board</p>		<p>The Curved Balance Board helps improve mental concentration by teaching individuals to keep their centre of gravity aligned over the bottom of the support. Challenging their balance forces their brain's left and right halves to communicate more, thus boosting coordination and challenging neuro-muscular communication. The board helps improve strength and coordination by challenging multiple muscles and joints to stabilise.</p>	<p>Floating - Sensory Room</p>
<p>Play Tunnel</p>		<p>The Play Tunnel is a wonderful way to encourage gross motor skills like crawling and rolling; this is an excellent addition to an obstacle course.</p>	<p>Storage</p>
<p>Weighted Snake</p>		<p>The Weighted Snake is the perfect buddy for an individual. The snake is designed to give deep pressure input and can be wrapped around the body or coiled up comfortably on an individual's lap.</p>	<p>Storage - Weighted/ Vibration Box</p>
<p>Weighted Blanket</p>		<p>The Weighted Blankets filled with soft micro-glass beads provide an opportunity for deep pressure calming input. The weight of the blanket serves as deep touch therapy, stimulating the deep touch receptors all over an individual's body that promote a more grounded and safe feeling.</p>	<p>Storage - Weighted/ Vibration Box</p>
<p>Metallic Assorted Mini Blocks</p>		<p>The Metallic Building Blocks are light and easy to hold. The beautiful set of shapes will engage play, design, stacking and construction.</p>	<p>Storage - Metallic Mini Block Box</p>

<p>Fidget Soft and Spikey Kit</p>		<p>The Fidget Soft and Spikey Kit is a selection of fidget tools with soft spikes containing balls that can be turned inside-out (putting the points in the middle).</p>	<p>Storage - Tactile Box</p>
<p>Body sock (Large Red, Small Blue)</p>		<p>The Lycra Suits offer a truly unique tactile, proprioceptive and deep pressure experience.</p>	<p>Storage - Body Socks Box</p>
<p>Lycra Tunnel</p>		<p>The pressure provided by the Lycra Tunnel around an individual's body can result in deep pressure touch stimulation. This stimulation releases serotonin in the brain, helping children and adults relax, concentrate on a task, and moderate their sensory input. Individuals can develop and practice bilateral coordination, motor planning, body awareness, tactile discrimination, gross motor skills and core body strength.</p>	<p>Storage - Body Socks Box</p>
<p>Time Timer</p>		<p>The Time Timer Plus – 60 Minute helps teach individuals the concept of elapsed time and manage the stress of transitions by showing "how much longer".</p>	<p>Storage - Timers/mirror</p>
<p>River Stepping Stones</p>		<p>The River Stepping Stones are great for coordination, estimating distances, and conquering fears of jumping on or off objects. Each river stone has three sides of varying angles and six rubber buttons underneath, guaranteeing non-slip stability.</p>	<p>Storage - Stepping Stones Box</p>

<p>Glow in Dark Ball</p>		<p>The Glow in the Dark Ball is a large, soft stress ball full of high-quality foam, which gives these balls a wonderful soft feel. This is a popular fidget and calming tool, and it is also a great way to work on fine motor development and hand strength.</p>	<p>Storage - Tactile Box</p>
<p>Turtle Vibrating Cushion</p>		<p>The Turtle Vibrating Cushion is a lightweight, colourful animal cushion that offers a gentle vibration when sat on, hugged or squeezed. This encourages the body to calm and relax and is excellent for those with anxiety. The cushion is a great resource for individuals who have trouble sitting calmly for extended periods.</p>	<p>Storage - Weighted/ Vibration Box</p>
<p>Magnetic Connetix Tiles</p>		<p>Designed to be used on the LED Magnetic Wall, the Connetix Tiles allow individuals to construct 2D and 3D shapes, using their imagination and creativity to play and build. The magnetic tiles encourage cognitive development, spatial awareness, fine and gross motor skills and hand-eye coordination. The tiles also help children build knowledge around scientific and mathematical concepts – all through play.</p>	<p>Storage - Connetix Tiles</p>
<p>Balance Cushion</p>		<p>The Balance Cushion is an inflatable circular cushion designed to assist with balance when standing on it. As a seating aid, it provides much needed vestibular input.</p>	<p>Storage - Fidget</p>
<p>Textured Mitten</p>		<p>The Sensory Mittens are great for individuals who have tactile defensiveness or sensitivity. They are great for creative play, touch exploration and sensory integration.</p>	<p>Storage - Fidget</p>

<p>Tactile Ring</p>		<p>The squeezable Tactile Rings are great for sensory feedback, building strength in the hands, releasing tension or just as a tactile fidget toy.</p>	<p>Storage - Fidget</p>
